

Tanapong Tirapattharachai

Software Developer

I am an analytical and approachable professional with experience in the Retail, Ecommerce, and Information Technology industries with a passion for making a lasting impact through projects. I have developed skills in both backend development and front-end design. My goal is to leverage my transferable skills and transition to a role as a Software Developer, where I can utilize my background in technology and make meaningful contributions to the field.

- Thai (Native)
- English (Professional)

EXPERIENCE

Generation Thailand

Junior Software Developer Bootcamp *Learner*, 09/2022 - 12/2022

- Developed proficiency in building web applications using MongoDB, Express, React, and Node.js.
- Utilized agile methodology to develop and implement a software project utilizing the MERN stack.
- Acquired essential skills for successful tech careers, including a growth mindset, effective communication, agile methodologies, and teamwork.

LG Electronics

Demand Planner, 01/2022 - 06/2022

- Utilized a collaborative and consensus approach by working with Sales and Marketing to manage an average of \$4M/mo in sales.
- Analyzed historical sales trends and conducted extensive research on demand drivers to produce accurate forecast data.
- Collaborated with overseas factory and HQ members to devise a comprehensive and effective shipment plan.

PROJECT

UpnDown, Sports Tracking Full Stack Web Application (MERN)

- Designed and developed the frontend of a web application using React, resulting in a user-friendly and visually appealing interface.
- Conducted backend development using Node.js and implemented Pair Programming techniques with a colleague to improve code quality and efficiency.
- Successfully implemented features in both the frontend and backend.

Moovies, Movies Review Web Application (React, Spring Boot)

- Developed and built a robust backend for a modern web application using Java and Spring Boot.
- Connected the backend to a MongoDB database to provide efficient data storage and retrieval.
- Created a dynamic and responsive frontend using React.

Sheout, Ecommerce Web Application (React, Material UI, Strapi)

- Utilized ReactJS and Redux Toolkit to create a fully-functional ecommerce application, resulting in a user-friendly interface.
- Incorporated Material UI to enhance the application's visual appeal and provide a consistent user experience
- Leveraged Strapi to develop a robust backend and integrate features such as adding products to a cart, completing forms, and processing payments through Stripe.

EXTRACURRICULAR

Bangkok Open Source Hackathon, Volunteer Staff

- Organized and led a hackathon event aimed at fostering a more robust and inclusive open-source community in Thailand.
- Facilitated connections and collaboration between contributors from diverse circles and communities resulting in the creation of innovative and impactful projects.
