Tanapong
Tirapattharachai

Software Developer

I am an analytical and approachable professional with experience in the Retail, Ecommerce, and Information Technology industries with a passion for making a lasting impact through projects. I have developed skills in both backend development and front-end design. My goal is to leverage my transferable skills and transition to a role as a Software Developer, where I can utilize my background in technology and make meaningful contributions to the field.

EXPERIENCE

Generation Thailand,
Junior Software Developer Bootcamp Learner, 09/2022 - 12/2022
- Developed proficiency in building web applications using MongoDB, Express, React, and Node.js.
- Utilized agile methodology to develop and implement a software project utilizing the MERN stack.
- Acquired essential skills for successful tech careers, including a growth mindset, effective communication, agile methodologies, and teamwork.

LG Electronics
Demand Planner, 01/2022 - 06/2022
- Utilized a collaborative and consensus approach by working with Sales and Marketing to manage an average of $4M/mo in sales.
- Analyzed historical sales trends and conducted extensive research on demand drivers to produce accurate forecast data.
- Collaborated with overseas factory and HQ members to devise a comprehensive and effective shipment plan.

PROJECT

BKK-WeSpace, Tree Population Open Source (Contributor)
- Spearheaded the ideation and implementation of a user-centric product feature.
- Collaborated closely with other contributors to ensure that my work was fully integrated with the rest of the codebase and aligned with project goals.

UpnDown, Sports Tracking Full Stack Web Application (React, Node)
- Designed and developed the frontend of a web application using React, resulting in a user-friendly and visually appealing interface.
- Conducted backend development using Node.js and implemented Pair Programming techniques with a colleague to improve code quality and efficiency.
- Successfully implemented features in both the frontend and backend.

Jammming, React web application with Spotify API (React)
- Developed a dynamic React website with an application that allows users to search the Spotify library, create playlists, and save them to their Spotify accounts
- Utilized Spotify's API to enable seamless communication between the website and Spotify's music library.

EXTRACURRICULAR

Bangkok Open Source Hackathon, Volunteer Staff
- Organized and led a hackathon event aimed at fostering a more robust and inclusive open-source community in Thailand.
- Facilitated connections and collaboration between contributors from diverse circles and communities resulting in the creation of innovative and impactful projects.
